

InfoNTD at [www.InfoNTD.org](http://www.InfoNTD.org) is the one-stop source of information on cross-cutting issues in Neglected Tropical Diseases. It is the place to search for articles, e-journals, e-books and tools on NTDs and related subjects.

InfoNTD is also an information sharing platform that is user driven and invites partners to actively collaborate. We encourage the NTD community to suggest new topics of interest and to contribute to the content of the portal.

InfoNTD provides scientists, professionals and others working in the field of NTDs with:

- information on issues such as wound management, disability, stigma, mental health consequences, and WASH
- document delivery
- literature searches
- tools and training materials
- monthly e-newsletter with an overview of recent publications

The newsletter contains a selection of recent publications on cross-cutting issues in NTDs. If you are interested in this newsletter please send an e-mail to: [Info@InfoNTD.org](mailto:Info@InfoNTD.org)

On the InfoNTD home page there is also a separate page designed for The Neglected Tropical Disease NGO Network (NNN). On this page the DMDI Working Group and Task Groups share their minutes and documents on a password protected area. All Task Group members have access to these documents using the password.

For more information please contact Ilse Egers [Info@InfoNTD.org](mailto:Info@InfoNTD.org)

InfoNTD is an initiative of American Leprosy Missions and the Netherlands Leprosy Relief, and offered through the NTD NGO Network.
